Sheri - June 10, I take generics lamictal included , but always wondered if they were equally effective. However, another way to avoid observational bias would simply be to look at actual blood levels of medications before and after a switch to generic. Notify me of new comments via email. Email required Address never made public. I was started on Lamictal in the mental hospital to treat the symptoms of Bipolar I, but my supply of medication ran out about 1 week after I was discharged. A series of articles have been published on this issue now. This drug is available to me through a mail-order prescription drug company, Medco, which is part of our insurance package. Excerpts and links may be used, provided that full and clear credit is given to Crazy Mermaid and Crazy Mermaid's Blog with appropriate and specific direction to the original content. I am worried about the different reaction he will have if any on this generic version. One of the first major articles on this issue may include such a bias. You are commenting using your Twitter account. However, some evidence suggests that generic lamotrigine is not quite equivalent. I will probably determine what to do by the time I get home. Thanks for looking into this. One of the ways investigators have tried to compensate for observation bias is to compare rates of return to trade name switching amongst different medications. My daughter is 23 yrs old and has been on lamictal for 7 years and all has been perfectly fine. Recently the insurance company would not let her prescription be filled unless she had tried the generic brand name. She started taking the generic brand name Lamitrogine last monday and by Wednesday was having breath. Jul 23, - METHODS: This randomized, double-blind, multiple-dose, steady-state, fully replicated bioequivalence study compared generic lamotrigine to brand-name Lamictal in "generic-brittle" patients with epilepsy (n = 34) who were already taking lamotrigine. Patients were repeatedly switched between masked. Aug 3, - A majority of studies that analyzed switch from the brand-name to generic AEDs included patients taking various AEDs 711 or lamotrigine The risk . vs 2, [1,3,] mg, respectively; P=) and the median duration of treatment with LEV before switching (4 [34] vs 3 [24] years, respectively;. Generic Lamotrigine Versus Brand-Name Lamictal Bioequivalence in Patients With Epilepsy: A Field Test of the FDA Bioequivalence Standard. Ting TY, Jiang W, Lionberger R, Wong J, Jones JW, Kane MA, Krumholz A, Temple R, Polli JE. Epilepsia ;56(9) /epi [PubMed]. OBJECTIVE: To test. Overall, of doctors to whom the survey was sent, 6 physicians provided data on 8 patients who experienced adverse reactions on a brand-to-generic switch. By contrast, another study found higher rates of switch back overall: 28% for lamotrigine, versus between 21% to 44% for other anti-seizure medications. Dec 21, - To test the current U.S. Food and Drug Administration (FDA) bioequivalence standard in a comparison of generic and brand-name drug pharmacokinetic (PK) performance in "generic-brittle" patients with epilepsy under clinical use conditions. This randomized, double-blind, multiple-dose, steady-state, fully. Suggested Reading Gagne JJ, Kesselheim AS, Choudhry NK, et al. Comparative effectiveness of generic versus brand-name antiepileptic medications. Epilepsy Behav. ;52(Pt A) Kesselheim AS, Misono AS, Shrank WH, et al. Variations in pill appearance of antiepileptic drugs and the risk of nonadherence. Sep 10, - Hi there - I really appreciate this very interesting info about Branded versus Generic versions of certain drugs - I had never heard of it before until my GP wrote this on my prescription - luckily for me, she was taking me "UP" the ladder from generic to branded so I had no unpleasant side effects. It is great to. Feb 29, - Dr Ting talks with Dr Wilner about the results of her study on the bioequivalence of generic and brand-name drugs for epilepsy. Jul 7, - Reassurance as to the bioequivalence of generic formulations of the antiepileptic drug lamotrigine with the branded product, Lamictal (GlaxoSmithKline), has come from a new study sponsored by the US Food and Drug Administration (FDA). The study showed that two disparate lamotrigine products.
