My two cents on why the claims are misleading is as follows: Crooked Timber Inside Higher Ed. Well today is my second day on Citalopram and I noticed that immediately after taking it I feel confused, tired, and paranoid. I was on 10mg. The major side effect was the weight gain. Celexa , citalopram , escitalopram , Forest , Lexapro. The evidence cited to support the greater efficacy of escitalopram over citalopram is very weak. I asked my doc if I can go back on Lexapro. It sort of goes away after a little while but I don't like the feeling. While true that citalopram is not FDA-indicated, this should not be taken as a sign that it would perform worse than escitalopram in anxiety. Roy Poses at Health Care Renewal received a letter telling him about the dangers of using citalopram versus using Lexapro. That was it is now and again I am experiencing some upswings in the anxiety department. Given my lack of time, don't expect multiple daily updates. Newer Post Older Post Home. It comes from looking only at the few instances where escitalopram showed a very small advantage over citalopram and ignoring the great majority of the evidence that suggests equivalent efficacy of the two compounds. Last updated: February 9, Author: Flavio Guzman, MD Editor Psychopharmacology Institute. Citalopram (Celexa) and escitalopram (Lexapro) are two commonly prescribed SSRIs used for the treatment of depression and anxiety disorders. This brief multimedia tutorial explores the differences and similarities between ?Introduction: Basic Concepts ?Pharmacology ?Indications and Off-Label. Aug 14, - As of , only Celexa is available as a generic drug. Lexapro, which will not be sold in generic form until after , must be purchased under the brand name until then. Lexapro is a more expensive option than the citalopram, the generic version of Celexa. Apr 9, - I was on Lexapro for years - 20mg 1xprday. Due to the increase in cost I went back to Paxil. I'm not sure if they are really in the same family and have noticed a difference in my overall demeanor and have gained a "healthy" 7 pounds. What is the difference and is Citalopram (generic for Celexa) a better and Citalopram - Is Celexa and Lexapro the same thing? Sep 10, - It seems both medications can be used to treat depression and are similar chemically and are both made by the same manufacturer. But they are very different in some ways and are not interchangeable. Only Lexapro is approved to treat anxiety, and only Celexa is available as a generic. Celexa might work. Apr 29, - In one recent study, a group of Canadian psychiatrists described seven cases in which patients with depression were taking Paxil or Celexa. When their medication was switched to the generics -- paroxetine and citalopram they experienced a relapse of their depression. Other people with depression. Find patient medical information for Escitalopram Oxalate Oral on WebMD including its uses, side effects and safety, interactions, pictures, warnings and user ratings. Read the Medication Guide and, if available, the Patient Information Leaflet provided by your pharmacist before you start taking escitalopram and each time. BACKGROUND: Escitalopram is a highly selective serotonin reuptake inhibitor (SSRI). It is the therapeutically active S-enantiomer of citalopram. It has been shown, compared with placebo, to be an effective and well-tolerated treatment for major depressive disorders (MDD) in both primary and specialist care settings. This side effect, if present, should subside as the body adjusts to the medication. Citalopram is considered safe and well tolerated in the therapeutic dose range. Distinct from some other agents in its class, it exhibits linear pharmacokinetics and minimal drug interaction potential, making it a better choice for the elderly or. Escitalopram affects chemicals in the brain that may become unbalanced and cause depression or anxiety. Escitalopram is used to treat anxiety in adults and major depressive disorder in adults and adolescents who are at least 12 years old. Escitalopram may also be used for purposes not listed in this medication guide. Apr 16, - As you may recall, Lexapro (escitalopram) is essentially a one-off copycat of Celexa (citalopram). An urgent letter was recently sent out from a marketing firm (which was hired by Forest) to inform doctors that evil managed care firms may attempt to switch their patients from Lexapro to generic citalopram.
