Initially, when pharmaceutical companies discover a new drug they are issued with a supplementary protection certificate SPC. Although they contain the same active ingredient as the branded product, generic versions of the drug are usually cheaper because the research and development costs have been less. The brand name in this case Viagra is the name given to the product by the original company who made the drug in this case Pfizer. Your GP can prescribe sildenafil as long as it is safe to do so. So far, Boots is the only pharmacy to have been given such permission. Sildenafil is associated with a very small, rare risk of heart problems such as angina, heart attack or heart rhythm problems. This also applies to amyl nitrites poppers a recreational drug. Now that the patent has expired other pharmaceutical companies will be able to market their own versions of sildenafil citrate. The generic name refers to the active ingredient in the drug in this case sildenafil citrate. You should always have an individual risk assessment from your GP or the doctor in charge of your care before you start taking sildenafil. Medical professionals, including trained pharmacists, can apply for permission to issue certain drugs under the Patient Group Direction scheme. Interactions Do not take sildenafil if you are taking medicines that contain nitrates as the combination may cause a potentially dangerous decrease in your blood pressure. Boots is the only pharmacist to have received permission to sell prescription-only viagra, and any issuing of viagra must be accompanied by appropriate health checks.
